TENDERISER FM 35

The Tenderiser FM 35 is a popular, robust and solid product from Edertal. The design and material conform to hygiene and occupational safety requirements as well as EG-principles.

The special induction motor is maintenance-free, quiet running and gear driven. Motor housing, safety cover and the Tenderiser-barrel are made from high-grade steel.

The safety cover is electrically secured and will not run without cover. The Tenderiser FM 35 is easy to clean and dismantle.

Use the Edertal FM 35 to tenderise all types of boneless meat product by placing in the top and tenderised product is released down on the steel plate below.
